TECHNICAL SKILLS

AWS ECS Fargate ECR
Docker CodePipeline
CodeBuild Terraform IAM
Grafana Prometheus Loki
Tempo OTel Lambda
Python Nginx Route 53
ALB

CERTIFICATIONS

- ▶ **DevOps Mastery Program**
GUVI, Chennai · Present
- ▶ **AWS Solutions Architect**
RedSysTech · Apr 2025
- ▶ **Warehouse Advantage Certified Associate**
Korber Supply Chain · Sep 2025
- ▶ **Full-Stack Development Training**
3Edge Solutions · Dec 2022

EDUCATION

B.E, Civil Engineering

AVS Engineering College
Jun 2014 – Apr 2018

HSLC

Sri Ramakrishna Hr. Sec. School
Jun 2012 – Apr 2014

1 SUMMARY

DevOps & Cloud Infrastructure Engineer with **4 years of IT experience** — AWS ECS Fargate migrations, CI/CD pipeline engineering, IAM security hardening, Docker/ECR containerisation, and full-stack production observability. At **Swirepay (fintech)**, managing multi-account AWS across staging and production in ap-south-1. Reduced CI/CD build time by **75%**, led zero-downtime EC2-to-ECS migrations, and built a Prometheus–Grafana–Loki–Tempo observability stack from scratch. Root-cause-first: diagnose from metrics, fix permanently, build for scale.

2 EXPERIENCE

AWS DevOps Engineer

Nov 2025 – Present

Swirepay · Chennai, Tamil Nadu

Fintech · Full-time

- ▶ **CI/CD Engineering:** Built and maintained 100+ CodePipeline + CodeBuild pipelines across ap-south-1 and us-east-1 for Node.js, Spring Boot, Java, Python, and React/Vite — Bitbucket → CodeCommit → ECR → ECS. Audited all entries; flagged dead pipelines and missing CodeBuild projects.
- ▶ **Build Optimisation:** 4-layer S3 caching (JAR, Maven, BuildKit, Trivy DB) with zstd; migrated base image to ECR Public (Corretto). Resolved Ubuntu 18.04 EOL apt failure.
Cold 40 → 10 min | Cached 25 → 6 min
- ▶ **ECS Fargate Migrations:** Led EC2 → ECS Fargate production migrations including Apache Superset — Aurora RDS permissions, ALB health checks, CORS, Secrets Manager re-encryption, and Route 53 DNS cutover with zero downtime.
- ▶ **IAM Security Hardening:** Replaced AWS-managed policies with scoped inline least-privilege roles across 10+ ECS task and execution roles; resolved cross-account ECR pull across 3 AWS accounts.
- ▶ **Observability Platform:** Deployed Prometheus + Grafana + Loki + Tempo + OTel Collector on ECS with path-based ALB routing and Cloud Map DNS. Grafana SMTP via SES + Google Workspace alerting for RDS CPU and Sentry JDBC incidents.
- ▶ **Serverless & Operations:** Python Lambdas for SES → S3 → DynamoDB pipelines; fixed Zelle email parser in production. Secrets Manager rotation, S3 audits, Qualys via SSM, Nginx/WordPress Multisite hardening with PHP 8.3-FPM and Redis.

AWS DevOps Engineer

Apr 2022 – Aug 2025

Enterprise Soft Labs Services Pvt. Ltd. · Hyderabad

Full-time · 3 yrs 4 mos

- ▶ **Infrastructure & Deployment:** Deployed end-to-end AWS infrastructure (EC2, ECS Fargate, ECR, RDS, S3, VPC, CloudFront) for TXENIA — an AI/ML supply chain platform on Django (Python 3.9) and React (Node.js). Custom VPCs, subnets, route tables, and IAM policies.
- ▶ **CI/CD & Containerisation:** GitHub Actions pipelines, Docker Compose containerisation, ECS Fargate with Route 53 and ACM SSL. Integrated MLflow for model metrics and Apache Superset for BI dashboards.
- ▶ **WMS Consultant:** DEV/UAT/PROD migrations for global clients — Dr. Max (Czech Republic), Good Eggs, MAERSK, Deccan & Cold Store. Managed Korber, Bartender, SSRS, IIS, Windows Server 2019, OpenVPN.

Site Engineer — Ranipet Municipality, Govt. of Tamil Nadu

Jan 2021 – Sep 2021

Road measurements, cost estimation, and site monitoring for civil municipal projects.

Site Engineer — G.K Constructions

Nov 2018 – Dec 2020

Site monitoring and daily estimation for a Central Government power grid warehouse project.

3 KEY ACHIEVEMENTS

SPEED
75%

Spring Boot gateway CI/CD — cold 40 → 10 min, cached 25 → 6 min via 4-layer S3 caching (JAR, Maven, BuildKit, Trivy) + zstd + ECR Public base image.

UPTIME
Zero

Apache Superset EC2 → ECS Fargate production migration — Aurora, ALB, CORS, Secrets Manager re-encryption, Route 53 DNS cutover, all end to end.

PIPELINES
100+

Full CodePipeline audit across ap-south-1 and us-east-1 — flagged dead pipelines, missing CodeBuild projects, and deletion candidates in a structured workbook.

IAM
10+

Least-privilege hardening across 10+ ECS services — scoped inline policies replaced AWS-managed, cross-account ECR pull resolved across 3 AWS accounts.

OBSERVABILITY
Full

Prometheus + Grafana + Loki + Tempo + OTel Collector on ECS — path-based ALB routing and Cloud Map DNS replaced a fragmented multi-ALB architecture.

4 DELIVERY PIPELINE

Bitbucket → CodeCommit → CodeBuild → ECR → ECS Fargate — fully automated, zero-touch deploys.
